

Improve your blood circulation with Danshen Plus!

Do you often have pain, are tight chested, short of breath, get hot flushes or are forgetful?

Do you suffer from headaches, dizziness, cold hands or feet, or struggle to fall asleep at night?

Are you suffering with coronary heart disease (CHD), angina pectoris, hypertension, heart failure, cerebral infarction (stroke), diabetes, liver or kidney problems? Do you know that all of the above mentioned symptoms and diseases are related to your Blood Microcirculation System?

Microcirculation is the smallest blood vessel network responsible for supplying energy and information to your body.

Any disturbance in the microcirculation system may cause blockage or an interruption in blood flow to certain parts of the body. This in turn may cause various problems in the human body.

About 5 000 years ago ancient Chinese people were the first to discover the use of Traditional Chinese Medicines (TCM) to treat microcirculation disturbances.

Danshen Plus, the modernised pure natural Traditional Chinese Medicine (TCM) formulation, in capsule form, is a wonderful supplement for prevention and treatment of cerebral and heart diseases as well as microcirculation disturbances. Its function is to clean the blood and blood vessels.

According to the results of clinical trials, Danshen Plus proved effective on coronary heart disease, strokes, diabetic complications, lowering blood

lipid (fat) and cholesterol, protecting the kidneys and the liver.

Danshen Plus is registered in more than 30 countries around the world and was one of the first traditional Chinese medicine brands to gain United States FDA IND (investigational new drug) approval.

Danshen Plus is a registered trade mark and is owned by the Tasly Group based in Tianjin, China.

Tasly is accredited with the Good Manufacturing Practice Certification (GMP) of Australia and operates on five continents. Tasly Group takes the Pan-Health Industry as its orientation and traditional Chinese medicines (TCM) is its core business.

It has a portfolio of businesses in plantation, healthcare products, cosmetics, health drinks, new package industries and real estate investment.

Tasly brought Danshen Plus to South Africa in 2002.

It upholds the corporate philosophy of "Harmonising Human and Nature, Improving the Quality of Life".

Tasly adheres to the mission of modernisation and globalisation of TCM.

After its six years in southern Africa, thousands of people have become loyal believers of Danshen Plus.

One hundred thousand residents of southern Africa have become registered members of Tasly, and millions of residents have been relieved from sickness and illness by using Danshen Plus.

Derick Benito was introduced to Tasly products and the business opportunity in March 2003.

He opened the first Tasly Speciality Store in the Eastern Cape.

Derick is a qualified Microcirculation Technologist and a member of the Ethnomedicine Practitioner's Association (EPASA).

"I am promoting the Tasly business because I believe in the Tasly products, especially the Danshen Plus.

"I have tested over 4 000 people in the last few years using the Tasly Microcirculation Machine, and have seen how the Danshen Plus changes their microcirculation blood flow and how their health has improved as a result," says Derick.

Tasly has not only brought excellent products to South Africa, but have created a wonderful self-employment business opportunity for the people of South Africa.

Approximately 100 000 Tasly members and 200 Tasly Speciality Stores are distributing Tasly products and sharing Tasly health knowledge and business experiences in South Africa.

To quote Tasly South Africa Regional Marketing Manager, Samuel Wang: "Tasly aims to uplift people in both health and wealth."
